WE STAND AT A CROSSROADS

climate change is **rapidly destroying** the life support systems of the planet.

Governments continue to prioritize corporate interests while ignoring the oncoming juggernaut of climate change.

THIS CANNOT BE ALLOWED TO CONTINUE.

Ten years after the historic WTO shutdown in Seattle, world leaders will come to Copenhagen for the UN Climate Conference. This will be the most important summit on climate change ever to have taken place, but there is no indication that this meeting will produce anything more than a green washed blueprint for corporate control of the world.

for the planet and all of its societies
we must take

direct action

against the **root causes** of climate change

Stay posted for action alerts, resources & details on the rising groundswell of a **NORTH AMERICAN MOBILIZATION**

FOR CLIMATE JUSTICE

to coincide with the Winter Copenhagen Climate Circus
